

## TESTIMONIALS

### SANTA BARBARA COUNTY SHERIFF'S DEPARTMENT

#### *Santa Barbara, California*

*I thought you'd be interested to know that we ended up using your bag the day after we received it. It showed up at my house on Thursday afternoon, and we had an ocean recovery on Friday morning. Despite having no time to train with your product, and having to actually open the package on the flight line as we loaded into the helo, the bag was incredibly effective and easy to use. Based on where we did the recovery, and the gnarly conditions that we endured, I'd hate to think about how that callout would have gone with a regular zip up plastic body bag.*

*Because of how well it worked for us, we will likely be ordering several replacement bags in the future.*

**DEPUTY TRAVIS HENDERSON**

### GRAND PRAIRIE FIRE DEPARTMENT

#### *Grand Prairie Texas*

*Grand Prairie Fire Dept recently purchased the x7ix underwater bag system to be placed on our rescue boat. Within five days of delivery, we had a drowning possibly involving foul play at the lake we service. We located the victim on sonar in about twenty feet of water. Two divers were deployed with the new bag system and easily recovered the victim in a matter of minutes. Not only was this system quick and easy, with possible foul play involved, it helped preserve any evidence. We have placed an order for several more bag systems and will continue to make them part of standard equipment on our boat.*

**BILL MURPHY, BATTALION CHIEF**

### PERQUIMANS COUNTY TECHNICAL DIVING & RECOVERY

#### *Perquimans County, North Carolina*

*Another dive team gave us the bag to try today, we had a 275lb man in 25ft.of water with zero vis. The bag worked perfect. Thanks.*

**CHIEF SYMONS**

### JOLIET FIRE DEPARTMENT

#### *Joliet, Illinois*

*... "I think it is a vast improvement over the previous bags that we had because it is more of a side load approach rather than trying to get the bag entirely under the recovery subject. With more practice it will be a much more efficient operation. I think that we would have had to put a diver in the water if we didn't have this new style bag."*
