x7ix Victim Recovery System Instructions

OPENED

CLOSED

SUBMERGED AND FLOATING VICTIM RECOVERY

1

Locate victim and place head first into the bag.

2

Pull circle and bag over victim until completely in bag.

3

Loosen wing nuts a quarter turn. Close circle and fasten clip.

x7ix VICTIM RECOVERY SYSTEM PREPARATION

The x7ix Victim Recovery System can be deployed open or closed depending on recovery requirements.

1. Remove body bag from packaging.

2. Remove bungee cords and unroll.

3. Loosen wing nut on both sides.

4. Open circle.

5. Tighten wing nuts.

6. Body bag is ready for recovery.

x7ix VICTIM RECOVERY SYSTEM CIRCLE REMOVAL

The x7ix Victim Recovery System allows for the circle to be removed for decontamination or replacement.

1. Lay bag flat and undo clip.

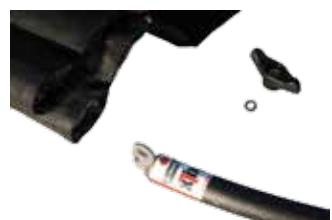

2. Remove wing nut and lock washer and separate hinge.

3. Remove each tube from opposite sides.

4. Remove both tubes and decontaminate or replace bag.

5. Slide non-studded hinge into sleeve on opposite sides of bag.

6. Replace both tubes in top and bottom sleeves.

7. Slide tube until Velcro catches in center of sleeve.

8. After both tubes are centered and replaced, align hinges.

9. Align stud with hinge on both sides of circle.

10. Insert stud into hinge on both sides of circle.

11. Replace lock washer and wing nut and slightly tighten.

12. Roll bag onto folded circle and replace bungee cords.
